

Dar Tech — Requirements Expansion Roadmap

Structured path from confirmed baseline to the complete system specification

Purpose: organize the next discussion into a controlled requirements workshop. Items in this document are roadmap/proposed items unless explicitly marked as confirmed in the earlier baseline.

Phase 1 — Confirmed Baseline

- Project, customer, team, source, timeline, agreement.
- Contract, invoice, payment/finance linkage.
- Serial/license, delivery, activation.
- Warranty, follow-up, renewal/update.
- Upcoming money and client resources.
- Online responsive professional website.

Phase 2 — Identity & Security

- SSO.
- Employee account/profile for every employee.
- Roles and permissions.
- Account lifecycle.
- Security and audit requirements.

Phase 3 — Operational Intelligence

- Dashboards.
- Global search.
- Reports.
- Automation engine.
- Advanced finance visibility.
- Customer and employee 360 views.

Phase 4 — Client Experience

- Expanded client portal.
- Customer-facing project visibility.
- Documents/resources.
- Approved license/invoice/contract visibility.
- Future support workflows.

Decision Log — Next Questions

- SSO provider: Microsoft Entra ID, Google Workspace, another provider, or multiple?

- Are employee roles fixed or can one employee have multiple roles?
- Which roles can access finance?
- Who can generate, activate, revoke or modify licenses?
- Should customers have their own portal accounts?
- Exactly what should a client see after login?
- Should contracts/invoices be downloadable by clients?
- Should the system include tasks beyond the confirmed lifecycle?
- Which notification channels are required?
- What are the exact warranty/renewal reminder rules by project size?
- What exactly defines project size?
- Does finance include expenses/profit or only incoming money?
- Are installments/partial payments required?
- Which currencies/taxes/payment methods are required?
- What exact license validation behavior is required?

Requirement Control Rule

Every new item should be labeled CONFIRMED, PROPOSED, or NEEDS VALIDATION. Only CONFIRMED items enter the frozen baseline.
